

Caframo Petite Digital

The Perfect Package

Caframo Petite Digital

Ultra-Compact and Efficient

This member of the Caframo overhead stirrer line is the ultimate in compact design. The BDC250 can be used in formulation, R&D, clinical research, education labs, anywhere a magnetic stirrer is used and much more. It fits into small spaces and can be easily transported to other labs or classrooms.

This stirrer is built in Canada with superior quality components, which include a brushless DC motor, digital display and intuitive keypad to ensure a long, maintenance free life.

The Petite Digital comes complete with accessories, ready for use. The package includes a stand, integral clamp, power cord, and both radial and axial impellers. The integral clamp fits stand rods (or lab lattice) up to 5/8" (16 mm) in diameter.

The power offered by this small, full featured stirrer surpasses anything you have ever seen in a stirrer this size.

Specifications

Model	BDC250
Speed Range	50-2500 rpm
Maximum Torque	10 Ncm
Maximum Volume	2 liters, water like viscosity
Electrical Input	100 to 240 volts, 50/60 Hz, 12 Watts
Output Power	7 watts
Weight (total package)	4.25 lbs (1.94 kg)
Weight (stirrer only)	1.0 lb (0.46 kg)

Stirrer, Stand, Integral Clamp, Power Cord, Axial and Radial Impeller included.

Three Year Warranty.

Features

Compact Footprint

- Ultra - Compact Design
- Weighs less than one pound
- Single hand control
- Fits any space

Complete

- Axial and Radial impeller
- Stand with 500x10 mm rod
- Integral clamp fits up to 5/8" (16 mm) rod
- Stainless Steel Collet with 1/4" (6 mm) opening

Quality

- Molded nylon housing
- Brushless DC motor
- Stainless steel impellers
- 3 Year warranty

Applications

- Keep samples suspended
- Education labs
- Cosmetic R&D samples
- Small batch mixing

Approvals

- To applicable UL and CSA standards
- FCC, CE, IEC1010
 - RoHS, WEEE compliant
